EEPROM For Weighing Controller

Descriptions

JMM은 Weighing Controller 의 Parameter 설정 값을 저장하기 위한 EEPROM Module 이다.

• Features

- Serial Peripheral Interface (SPI) Compatible
- Low-voltage and Standard-voltage Operation
 - 2.7 (V_{CC} = 2.7V to 5.5V)
- 3 MHz Clock Rate
- 64-byte Page Mode and Byte Write Operation
- Block Write Protection
 - Protect 1/4, 1/2, or Entire Array
- Write Protect (WP) Pin and Write Disable Instructions for Both Hardware and Software Data Protection
 - Data Retention: >200 Years

Specifications

- Interface : Serial Peripheral Interface (SPI) Compatible, DIP 10PIN Connection
- Memory Size : 128 / 256K Bytes
- Size : 24 * 16 * 12 mm (W*H*D)
- Operating Temperature.....-55°C to +125°C
- Storage Temperature-65°C to +150°C
- Maximum Operating Voltage 6.25V

Ordering Information

JMM : Base Code For Memory Module

1. Memory Size : 128 or 256 KB
